

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

Leitz Petrographical Microscopes

NEW MODELS—WITH ENLARGED FIELD OF VIEW

Microscope "S.M." with synchronic rotation of the nicols

These microscopes have been developed on the basis of latest suggestions from petrographists. Their novel and modern design will prove a great aid in petrographical studies.

Every leading petrographist knows the superior optical and mechanical qualities of Leitz microscopes and we therefore are fully safe if we refrain from enumerating the many features.

The variety of models we offer afford a suitable equipment for every specific requirement.

The complete assortment of our petrographical accessories will interest those who desire to add to their present equipment.

Some of the prominent features of the new model microscopes are:

1. Improved Objective Clutch Changer which guarantees the objective to be permanently centered.
2. Anastigmatic Tube Analyzer which permits a most crisp definition.
3. Special Illuminating Apparatus, whereby a wider range of application is afforded.
4. Enlarged Microscope Tube which accommodates eyepieces of wide diameter, whereby the field of view is increased 50% over other types of instruments.
